NTWP00016

Summary

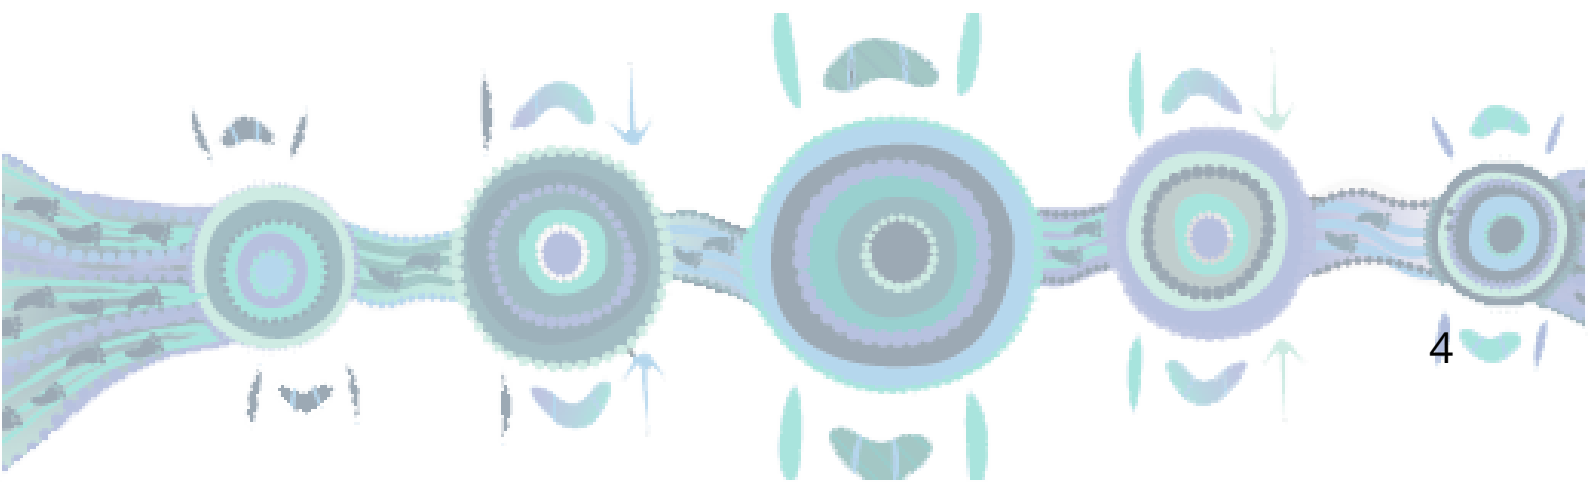

A generator upgrade has been carried out at Walangurrminy Community, with the primary focus on strengthening essential hardware to support reliable and sustainable power. This upgrade ensures that community health hardware and facilities can function effectively, directly improving the day-to-day living conditions of residents. By providing a consistent and stable power supply, the project supports healthier living standards and enhances the community's overall wellbeing.

Completed Scopes of works include:

- Manitou supplied for generator removal and installation
- Disconnect existing genset electricity, disconnect existing genset exhaust system, remove existing genset.
- Install new genset and connect new genset electricity, connect exhaust system to new genset
- Testing and commissioning

Contractor:

Works completed by Off Grid Electrical Installations
